

CSE Bliss HP Full Circle Hammer Mills for Pet Food Production

Proven Performance. Precision Results.

When it comes to producing high-quality pet food, consistency, efficiency, and control over particle size are critical. The CSE Bliss HP Series Full Circle Hammer Mills deliver unmatched performance and flexibility, built to handle today's diverse diet formulations with precision and power.

Advanced Design for Higher Capacity

The CSE Bliss HP Full Circle Hammer Mills feature a tighter hammer-to-screen clearance, resulting in:

- Increased capacity and throughput with the same horsepower and footprint as traditional mills
- Higher efficiency and finer finished product
- Consistent, uniform grind for optimal mix and pellet quality

Built for Reliability and Ease of Maintenance

Every CSE Bliss mill is designed for long service life and minimal downtime. Heavy-duty construction, precision machining, and modular components ensure your mill runs smoothly and efficiently — batch after batch.

Take Your Pet Food Production to the Next Level

With models ranging from 15 to 500 horsepower, CSE Bliss can tailor a solution to meet your specific particle size requirements and production targets across multiple diet types.

Join the leading manufacturers who rely on CSE Bliss for dependable, high-capacity milling performance.

Exceptional Throughput and Efficiency

CSE Bliss HP Mills are field-proven to deliver industry-leading results:

- **100 lbs / horsepower / hour on #4 ($3/16$ ") screens**
- **Equal to throughput rates of up to 20 tons per hour**
- **Designed to meet 20 ton/hr production goals for fatty dog food**

Our mills are engineered for maximum output without sacrificing efficiency or grind quality — helping you lower operating costs while maintaining superior product uniformity.
